## Experience

### Web Developer Freelance

Present

Achievements

- **Designed** and **developed** a system for stakeholder using **NextJS** prioritizing **ease of use, scalability, user-friendly** and maintained **clean code**.
- Pages were crafted with the **use of Figma** to ensure stakeholder satisfaction by visually seeing the design before proceeding with the development. Applied **UI/UX best practices** to improve **usability** and **user experience**.
- Containerized project with **docker container** for **small scale production**. Created optimized **Dockerfiles** to build the application and used **Docker Compose** to **manage multi-container setups**, including services like databases, frontend and backend.

### Web Developer Internship

ACET GLOBAL

12/2024 - 04/2025

Achievements

- **Designed** and **built** a **user-friendly, web responsive** application based on stakeholder's needs. Conducted stakeholder meetings to gather information and deliver effective solutions that **prioritize low cost development** while **maximising user experience** and integrating web functionality.
- Developed **custom functionality** with limited resources on Weebly based on stakeholder's requirement. Coded **custom javascript code** embedded on the website to dynamically update the website which **improves customer experience** and **usability**.
- **Introduced** and **assisted** with the migration of source codes to **Github** for **version control**, transparency, collaboration and **increased security**.
- **Collaborated** with the senior developer team in the development of a full stack project. Conduct **research** and gather insightful **information** in order to **improve** project **functionality** and **scope**.
- Performed **QA test** by **designing** and **executing feature-based test cases**, utilizing **Jira** to document results, track issues, and ensure full application stability and readiness for release.
- **Supported** the development team in **detecting bugs** and **fixing** them ensuring the feature works as expected while **maintaining clean** and **organized code** structure.
- Supported the migration and deployment of the project to a **cloud hosting provider**, ensuring **stable performance** and **working functionalities** in the production environment.

## Final Year Project Capstone unit

Monash University

2023 – 2024

Achievements

- **Delivered** a **fully functional web application** for a client. **Collaborated** in a **team of 5** to produce a web solution that **solves business pain points** through **PHP** stack development. Successfully **applied Agile methodology** throughout the development lifecycle to produce a fully functional solution in a limited time.
- **Designed** and **implemented** a database system in **SQL** to manage **products** and **business** data **efficiently**.
- **Build a good relation** with **stakeholders** through regular communication and **ensure client satisfaction** with the project.
- **Trained** and **helped stakeholders** transitioning from a paper-based system to a Web based solution. Successfully assisted in migrating client's data, ensuring accurate data loading into the database without errors.

## Education

### Monash University

Bachelor of Information Technology

2020–2024

Melbourne, Victoria

## Personal Projects

### Portfolio Project

- Developed a **fully responsive personal portfolio website** by converting **Figma designs** into a **live webpage** using **React**, **HTML**, **CSS**, and **JavaScript** libraries. Integrated **Motion Framer** for animations and interactive effects to enhance user engagement.

### React Fitness Tracker

- Built a **responsive fitness tracking application** that allows users to log and monitor workout sessions. Integrated **authentication** for multiple users and stored data securely using a cloud database.

### Shopify Ecommerce app

- Created a custom eCommerce website using **Next.js** and **Shopify Headless API** to showcase and sell products. Implemented **shopping cart functionality** and integrated **Stripe** for secure online payments.

### AI Transcriber application

- converts Figma designs into a working web app. Integrated **Google Speech-to-Text API** for audio transcription, with features to **upload files** or retrieve YouTube videos, and included a credit-based usage system.
